

REPORT TURNAROUND TIMES

RADIOLOGY | MRI & CT

THIS DASHBOARD IS DESIGNED TO OPTIMIZE AND MONITOR THE EFFICIENCY OF MRI AND CT IMAGING REPORT TURNAROUND TIMES.

Key Features:

Modalities: CT & MRI

Reported by: Reporting Radiologists

Key Points:

Priority: No verified report should take longer than 4 weeks after image acquisition, without exception.

Identifying Breaches:

The dashboard highlights any reports that exceed the national standard of 120 hours (5 days) for imaging reporting turnaround times, allowing for prompt corrective action.

Action Plan:

Any report at risk of exceeding 4 weeks should be managed through insourcing or outsourcing, with insourcing preferred within the imaging department or network.

Best Practices:

Aim to surpass industry standards by: consistently

Implementing subspecialty reporting strategies

Promoting collaboration across imaging networks

Allocating dedicated reporting time for all professional groups involved

Enhancing digital connectivity to streamline reporting processes
